Revision

For this phase 2 of project, we have listened for the feedback from Aj Morakot. We realized that we have a lot to improve and a lot to do. So, in this phase 2 we have to look back to some mistake and fix those mistakes in order to maintain the project in good shapes.

Introduction

The main target of this project is to make the website for the customer who wants to make a booking reservation system website which calls Travel Najah System. Travel Najah System consists of four main functions. The first one is a Flight ticket reservation, The second one is the car rental reservation, the third one is a hotel booking reservation, and lastly Booking a local guide tour.

Revision #1 Functional and Non-functional

2 things that need to fix is

- Non-Functional = Domain Exploration e.g., Booking.com Agoda.com
 - It isn't belonged to Neither Functional or Non-Functional
- Non-Functional = Hotel/ car/ Flight recommend.
 - Should be in the functional not non functional

Functional

1. Flight booking reservation
2. Car rental reservation
3. Room booking hotel reservation
4. Local Guide tour reservation
5. API to book the Flight (to maintain the flight ticket)
6. API to Rent the car (to maintain the car reservation)
7. API to book the hotel (to maintain the hotel reservation)

8. All the details must up to date
9. All the user must be able to see the Published content.
10. Web application on the internet.
11. User consists of Front-end and Back-end
12. Only membership user can access the reservation system.
13. The system have to handle the list of available guides.
14. The system must allow the back-end user to manage the local guide
15. The system must allow the back-end user to manage the local guide

16 Hotel, Flight and car recommend. << Added

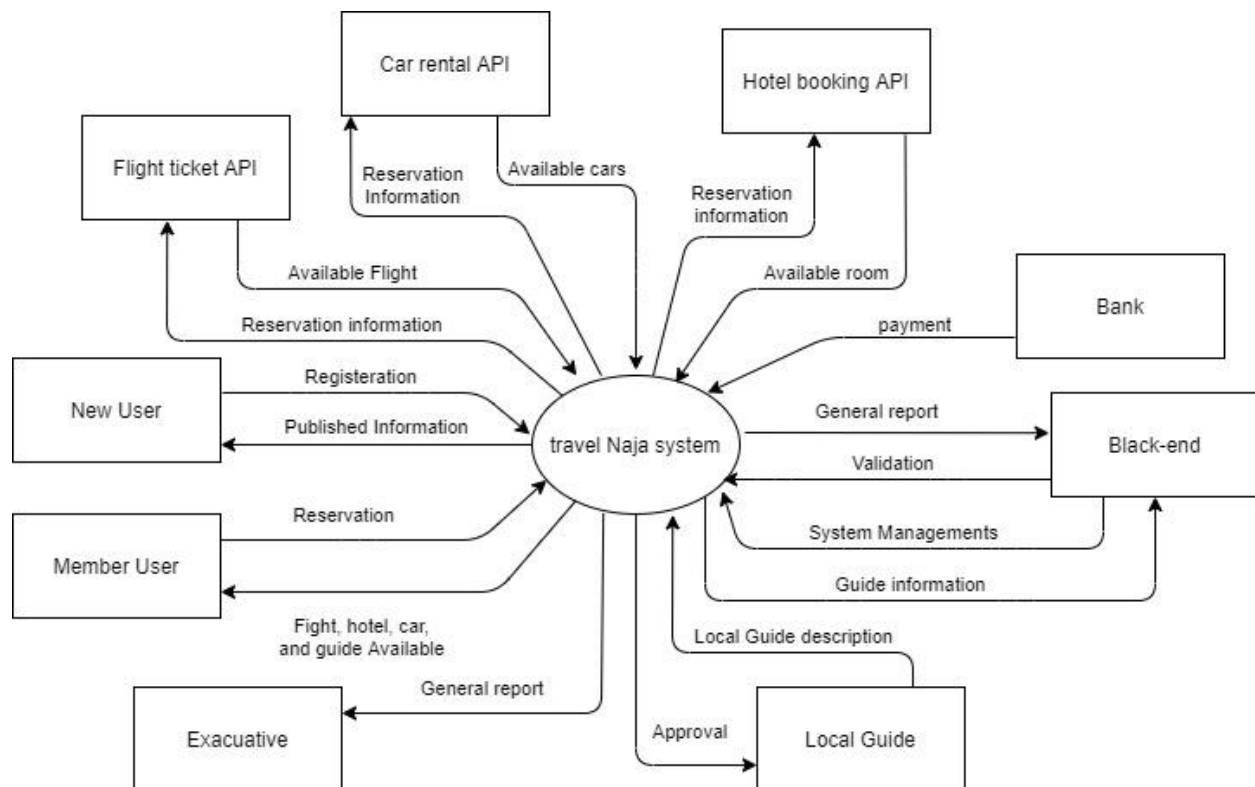

Non-Functional

1. 1000 transaction per second transaction between internal and external
2. Security priority
3. The system have to provide the fight ticket to the customer first
4. The Platform must have an application for IOS/ Android devices
5. Search result that match the customer style
- ~~6. Domain Exploration e.g., Booking.com Agoda.com~~ << Removed
7. Customer style search system e.g., Car system recommend Fight class recommend Hotel model
8. Provide the native app to the app for the phone web user.
- ~~9. Hotel/ car/ Flight recommend.~~ << Not belong to this category
10. Maximum Encryption technique for the website.

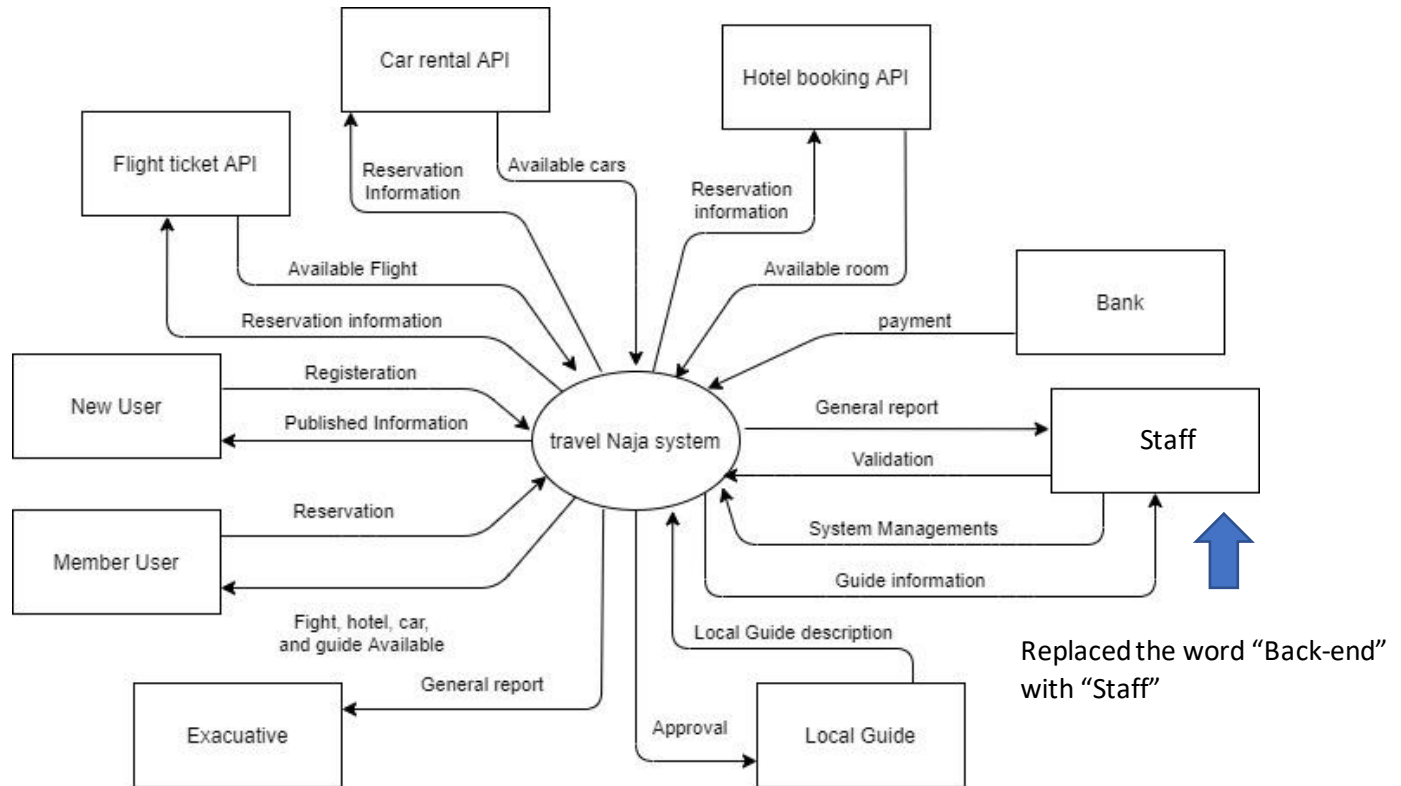

Revision #2 DFD Diagrams

Overall, of DFD diagram was perfect. However, it's is important for us to make them clear and perfect. Because it is necessary for the customer and the user to be able to understand our diagram. Also, it's help us recognize the important structure that we need to develop in phase 2.

OLD DFD Lv0 Diagram

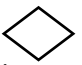

NEW DFD Lv0 Diagram

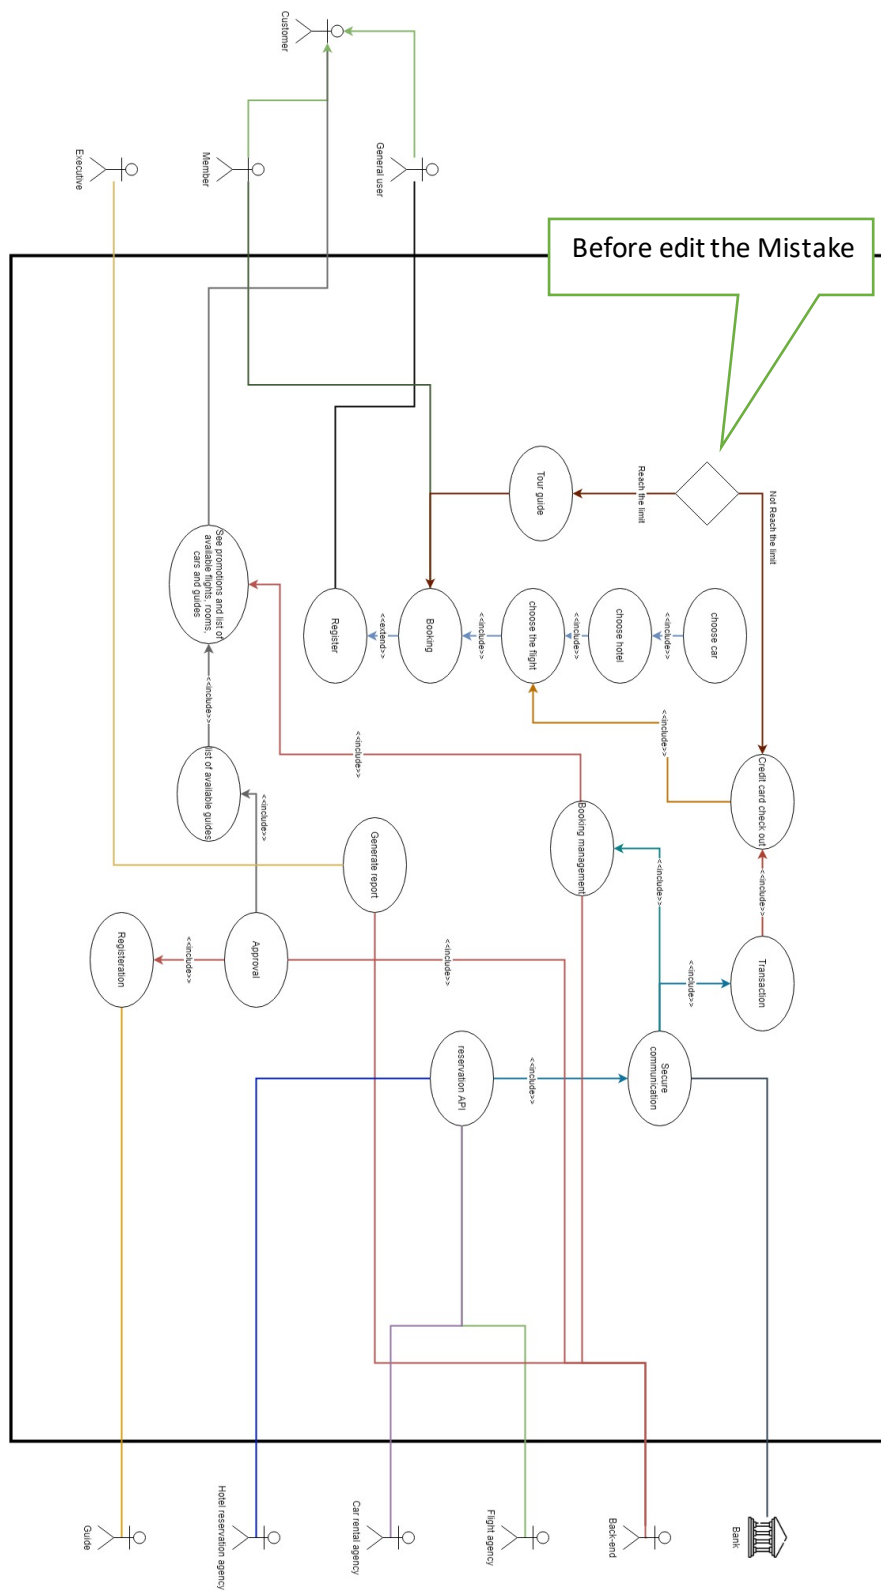

In DFD diagram we replaced the word "Back-end" with "staff" to make things clear.

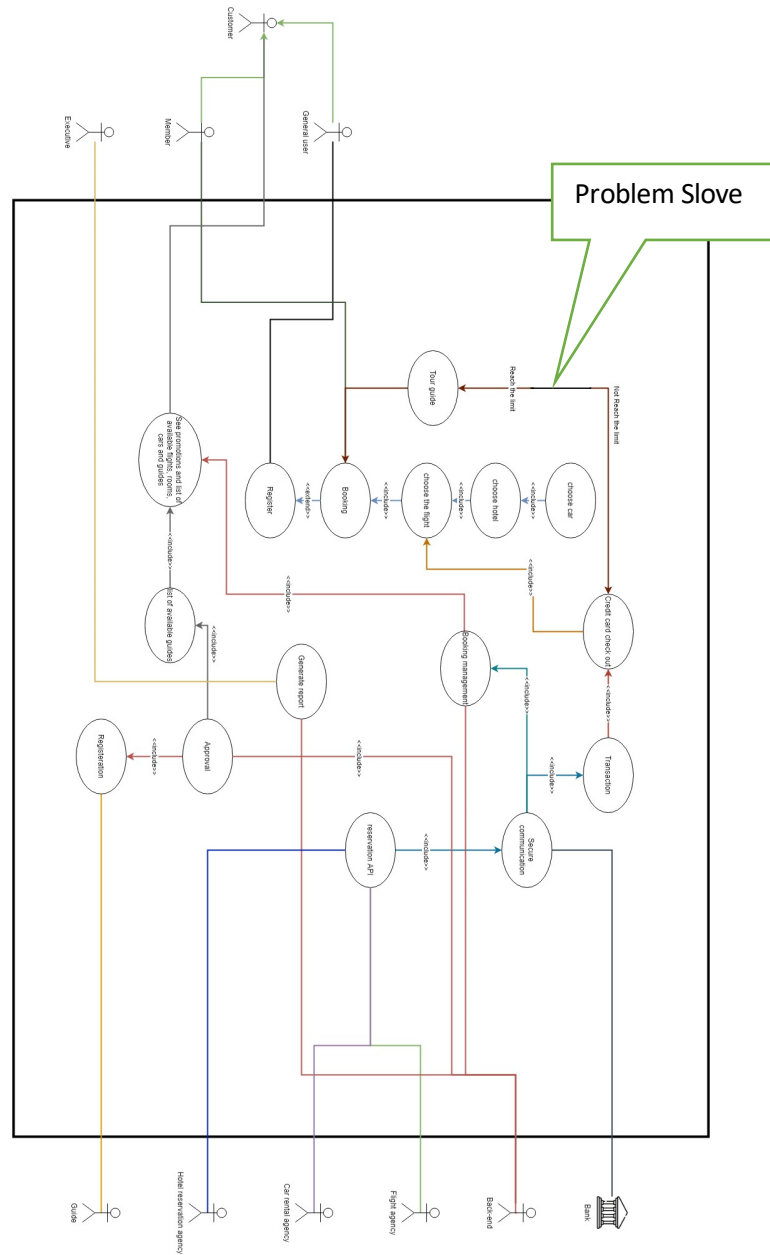

Revision #3 Use case diagram

Use case Diagram

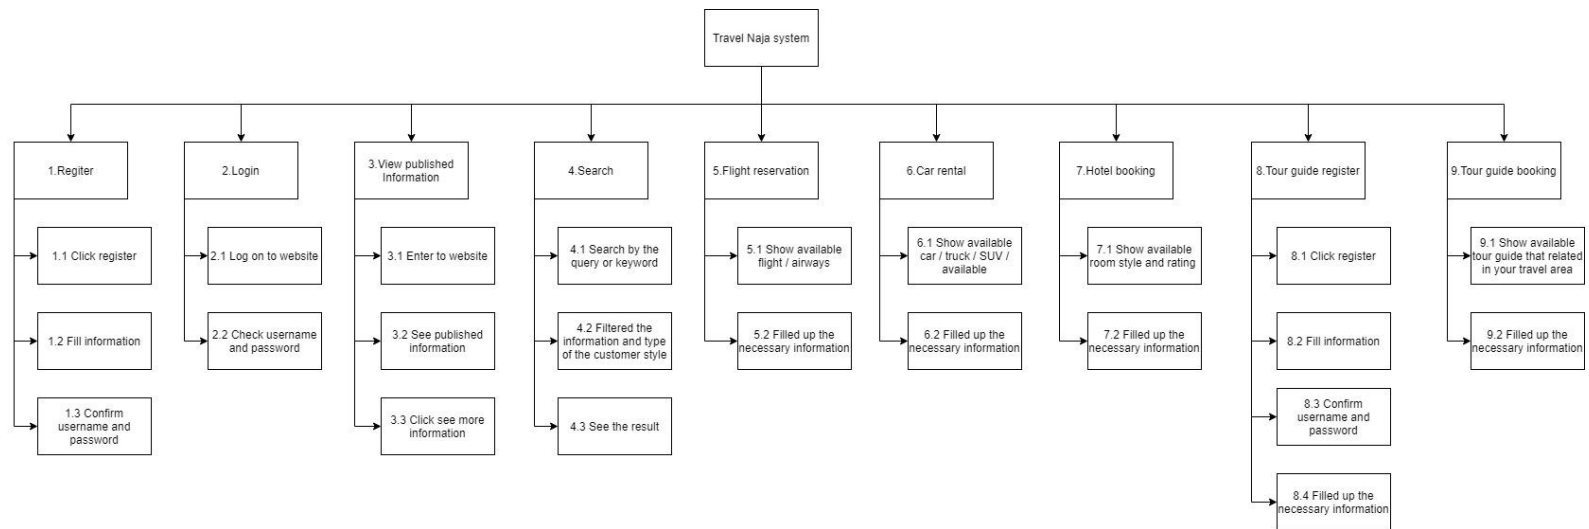

In the last time we made a mistake by putting the  Diagram. Which is incorrect. To make use case diagram completed we have to redesign and espically remove the  out.

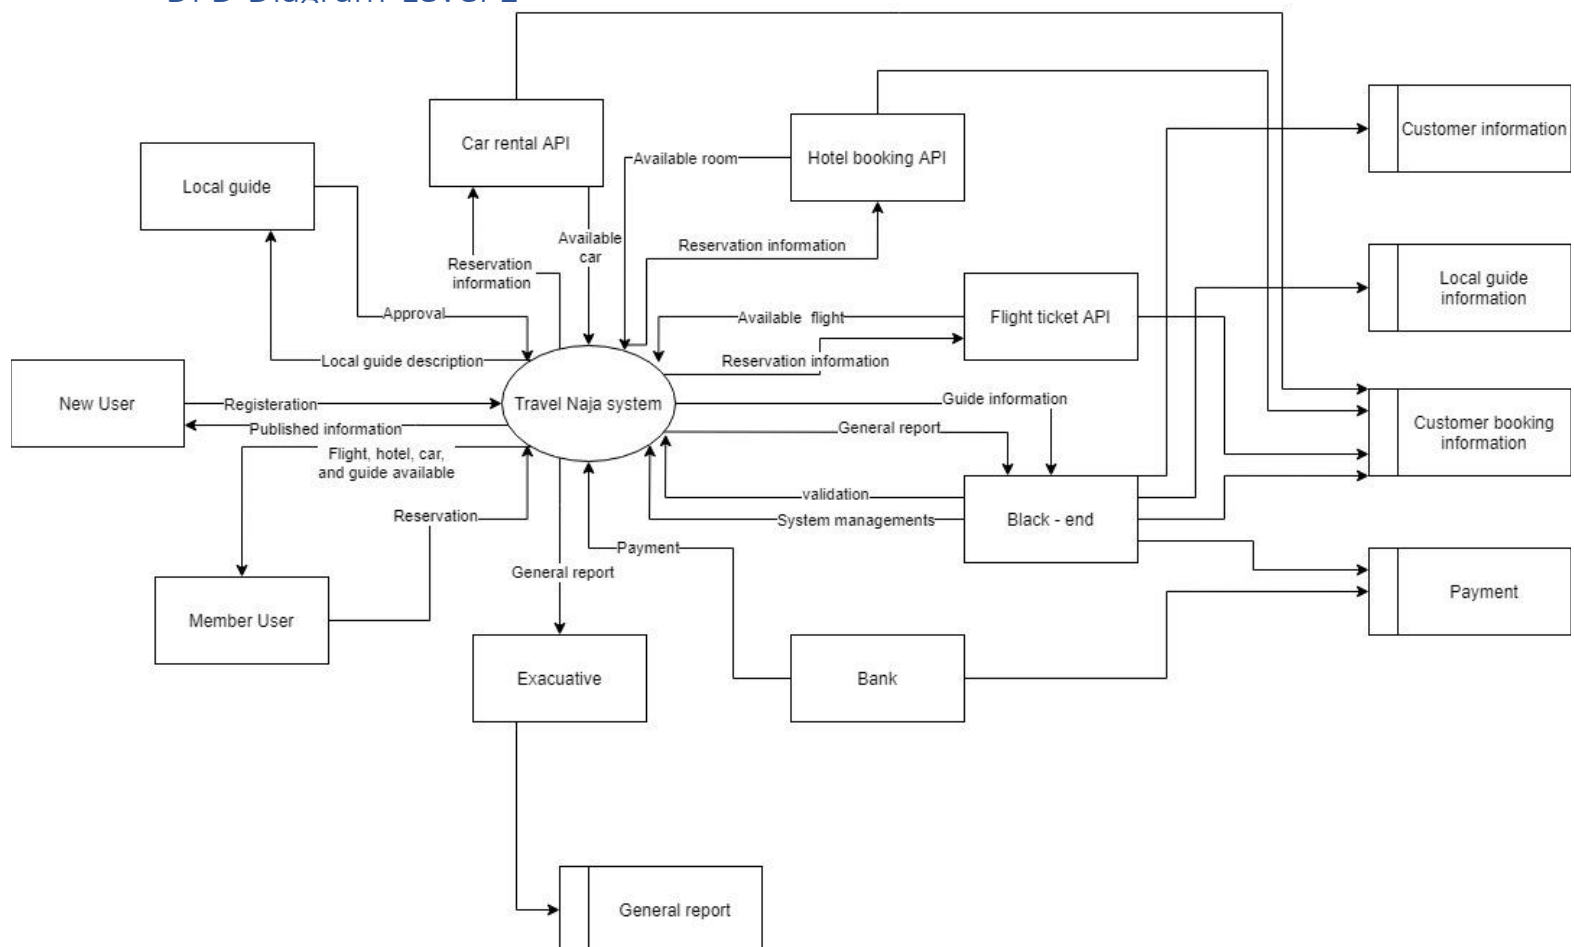

New use case diagram

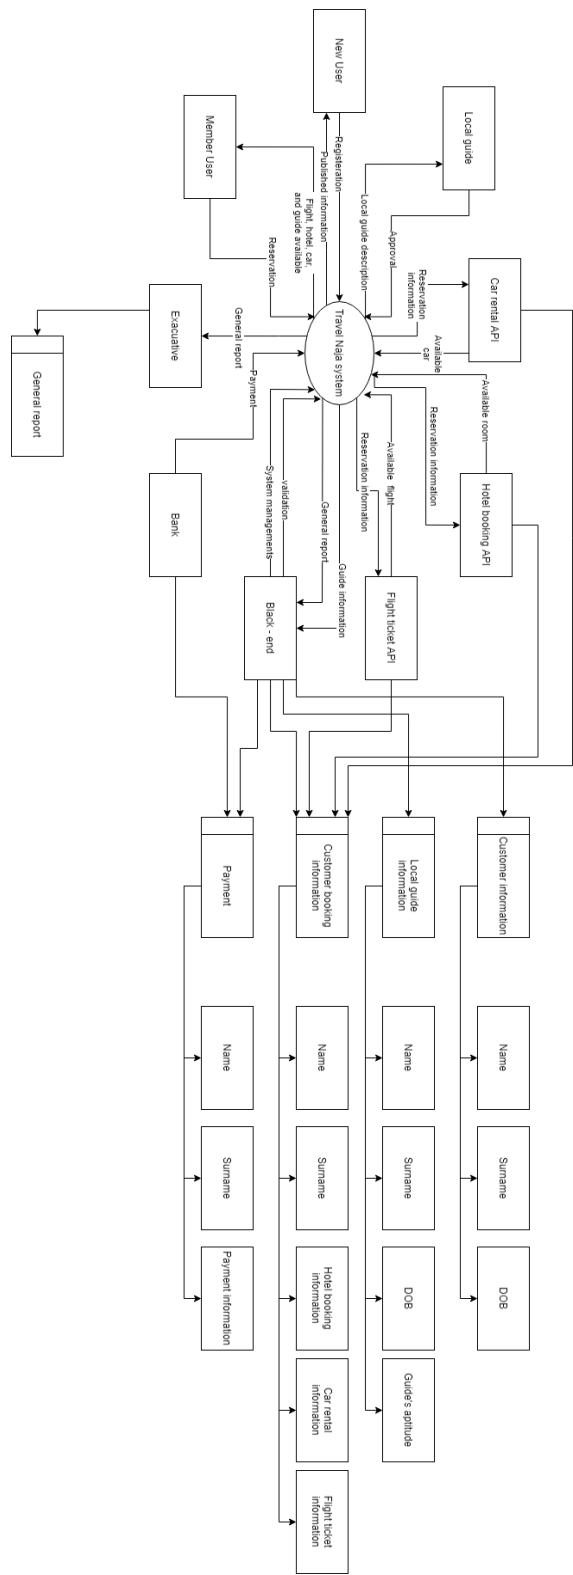

Functional decomposition diagram

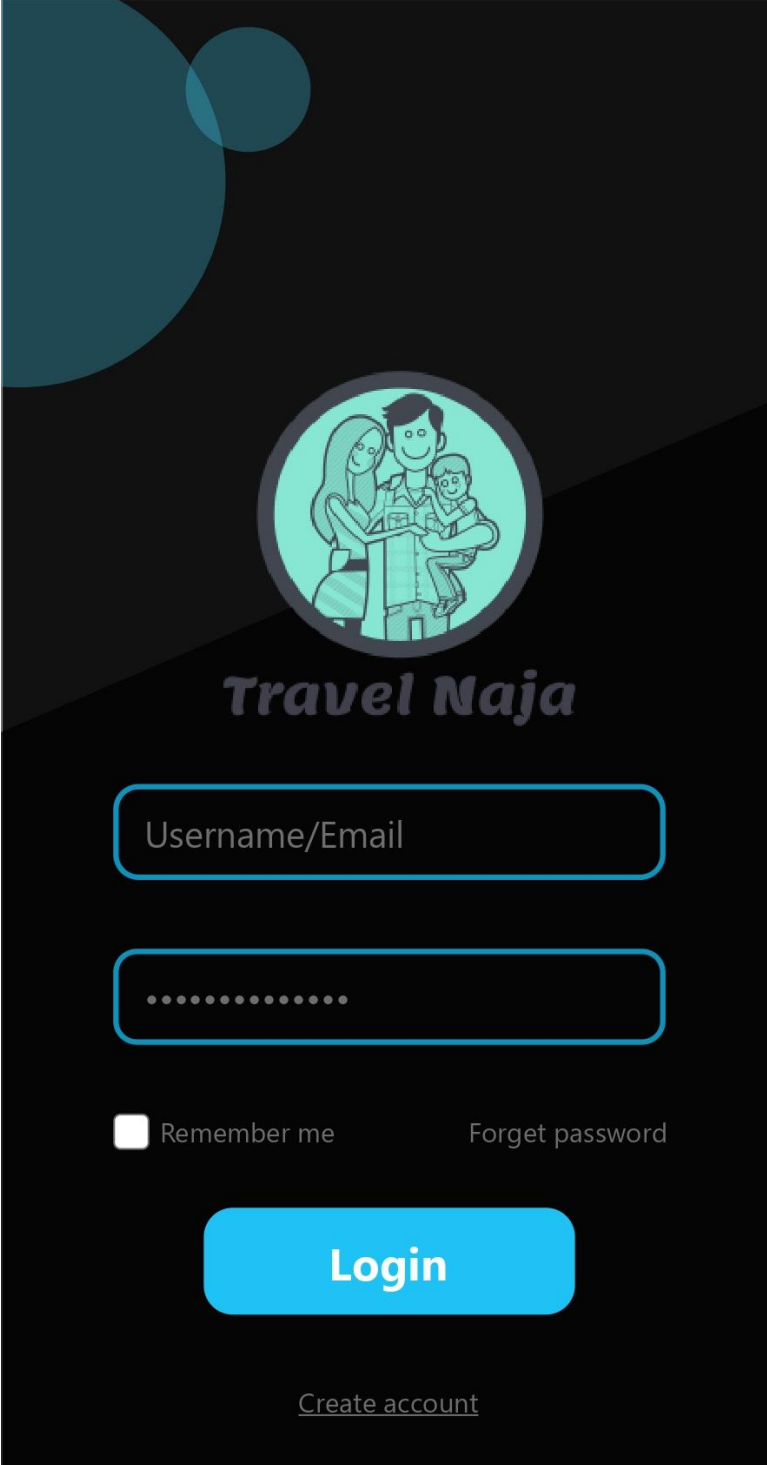

DFD Diagram Level 1

DFD Diagram Lv2

Mock up prototype

The mockup is a login page for 'Travel Naja'. It features a dark background with teal accents. At the top left, there are two overlapping teal circles. In the center, there is a circular logo containing a stylized illustration of a family (a man, a woman, and a child) in teal. Below the logo, the text 'Travel Naja' is written in a bold, teal, sans-serif font. Underneath the logo, there are two input fields: the first is labeled 'Username/Email' and the second is a password field with a series of dots. Below the password field, there is a checkbox labeled 'Remember me' and a link 'Forget password'. A large, rounded teal button with the text 'Login' in white is positioned below these elements. At the bottom, there is a link 'Create account' in a smaller, teal font.

This page is for local guide that want to use our system.

Tour guide need to fill all of the necessary information and wait for the confirmation.

Test Case

Test Case Template

Test case ID: Login to system

Test Designed by: Tamakorn

Test Priority (Low/Medium/High): Med

Test Designed date: 16-11-2021

Module Name: TravelNaja login screen

Test Executed by: 16-11-2021

Test Tide: Verify login and password.

Test Execution date: 16-11-2021

Description: Test TravelNaja login pages

Pre-conditions: User have corrected name and password

Dependencies:

Step	Test Steps	Test Data	Expected Result	Actual Result	Status (Pass/Fail)	Notes
1	Navigate the Login Page	test@email.com	User email	User can access the homepage	Pass	
2	Correct username	12341234	User Login	User can access the homepage		
3	Correct Password		User password	User can access the homepage		
4	Join as guest		User can access the homepage	User can access the homepage	Pass	

Post-conditions: Successfully login to the website/ application

Test case ID: Guide Registration

Test Designed by: Tamakorn

Test Priority (Low/Medium/High): Med

Test Designed date: 16-11-2021

Module Name: Guide Registration screen

Test Executed by: 16-11-2021

Test Tide: Verify tourguide registration.

Test Execution date: 16-11-2021

Description: Test TravelNaja Guide Registration pages

Pre-conditions: Tour Guide want to use TravelNaja platform

Dependencies:

Step	Test Steps	Test Data	Expected Result	Actual Result	Status (Pass/Fail)	Notes
1	Tour guide name and surname	Pasob Ubuttihead	User can input be able to put the information in the boxes	The web has to save draft for the user	Pass	
2	Tour guide National ID card	9 9999 999 99999	User can input be able to put the information in the boxes	The web has to save draft for the user	Pass	
3	Tour guide DOB	18/04/1980	User can input be able to put the information in the boxes	The web has to save draft for the user	Pass	
4	Tour guide salary	100,000	User can input be able to put the information in the boxes	The web has to save draft for the user	Pass	
5	Tour guide Tel.	099 999 9999	User can input be able to put the information in the boxes	The web has to save draft for the user	Pass	
6	Tour guide email	test@email.com	User can input be able to put the information in the boxes	The web has to save draft for the user	Pass	
7	Tour guide aptitude	Bacon	User can input be able to put the information in the boxes	The web has to save draft for the user	Pass	
8	Tour guide address	100/89 Soi 9 Muang lablae	User can input be able to put the information in the boxes	The web has to save draft for the user	Pass	
9	Confirm	-	User click confirm	User click confirm and wait for the email response from our staff	Pass/Fail	Depends on the tour guide ability

Post-conditions: Tour guide successfully sent the request from and wait for the confirmation form the staff via e mail
